

Wrangler™

Heavy Lift Drone

Meet the strongest and most advanced VTOL drone in history

With a heavy lift capacity capable of lifting truck sized payloads for delivery at distances previously thought unimaginable for a VTOL aircraft. This industry shaping aircraft will create new business opportunities for high growth and profitability. Multi-role capabilities for defense and commercial applications:

- Cargo transport
- Surveillance, interdiction & detection
- Intercept and communications platform
- Air cover and fire support
- Close area support
- Suppression of hostile sensors and networks

GTL's breakthrough Wrangler™ Heavy Lift Drone uses game changing technology that provides all day operating capability (without refueling) and is environmentally clean, meeting net zero climate needs. The new GTL Wrangler is an investment in your success.

Wrangler™ Performance

- 10-12 hour flight time
- 2,500 lb payload capacity
- 1 to 3 Standard Pallets
- 2,760 mile max range
- 15,000 ft max altitude
- $V_c \sim 220$ knots
- $V_{max} \sim 260$ knots

Environmental Benefits

- LH2 fueled power train
- Green LH2 results in Zero emissions

*Autonomous/Semi-Autonomous
